Dear Auwal Usman,

Thank you for your email regarding the DBS samples analysis at the African Centre for Neglected Tropical Disease and Forensic Bio Tech Lab in Zaria.

Permit me to first introduce MITOSATH.

MITOSATH is a national NGO with the mission to partner with government, communities and relevant stakeholders to improve the quality of life and promote human dignity. We support NTD intervention in 6 states (Bauchi, Ondo, Ekiti, Taraba, Niger and Lagos) in collaboration with our key donors like Sightsavers/Ascend, The ENDFUND, and TY Danjuma Foundation. We have been supporting interventions over 20 years .

The current global NTD elimination goal has prioritized the need for assessment to measure the impact of interventions. This has continued to be reiterated by FMOH. However, there are very few to no direct funding both within and outside the country for assessment of interventions that has been carried out.

We therefore look for collaborative efforts and support from relevant institutions like Sightsavers and your center to assist us measure our intervention impact so far. In view of the above, we planned to contribute the sum of N250,000( Two hundred and fifty thousand naira only) to the account stated in your email to support the analysis of our samples from Ondo and Ekiti state. Kindly confirm we can pay this money to this account.

Please, view your support as charity towards the elimination of NTDs in our supported States. We will recognize your center as contributing to our service to this regard.

In addition, as we continue to plead with our donors to prioritize epidemiological and entomological assessments, we will surely get back to you as they respond.

Once again, we thank you for your anticipated help.

Sincerely,

Dr. Francisca Olamiju
